

380 Transactive bariatric ceiling hoist

Bariatric clients often exceed a hoist's safe working load and this can create an unsafe working environment. In cases where a client's weight, size or medical condition requires precise control when transferring or re-positioning, this Bariatric Ceiling Track Hoist provides a safe and reliable solution.

The 380 Transactive ceiling hoist is specifically designed to lift clients that exceed a standard hoist's maximum weight capacity. As the strongest ceiling hoist in its class, the 380 Transactive bariatric ceiling hoist safely transfers bariatric clients with respect and dignity.
