Aged Care Package Provider

A bit about us...

Aged Care

At Active Mobility, we understand the importance of supporting the ageing population. We work closely with Aged Care Package Providers to ensure our elderly clients get the equipment and, more importantly, the care they deserve.

We are proud to be a dedicated supplier of quality aged care equipment designed to enhance the well-being and independence of older Australians. With a solid understanding of the challenges faced by older people and their support workers, we have curated a collection of aged-care mobility equipment, assistive devices, and adaptive solutions

Our aids and equipment for aged care

Aged Care Mobility Equipment

Wheelchairs: Manual wheelchairs are self-propelled or pushed by support workers, making them suitable for individuals with varying degrees of upper body strength. Electric wheelchairs offer greater independence to those who may not have the physical ability to operate a manual wheelchair.

Walking frames: Walkers offer stability and balance assistance. Rollators, a type of walker with wheels, brakes, and a seat, are particularly useful for individuals who need to take breaks while walking.

Mobility Scooters: Every electric scooter we offer has been carefully handpicked for its durability, performance, safety, comfort, and ease of operation. We ensure all our clients find the most suitable mobility scooter for their application.

Transfer, Bedroom & Bathroom Aids

Patient Lifting Solutions: Patient lifting hoists come in different configurations. Ceiling-mounted hoists provide more space and versatility in a care setting, and the appropriate sling type should be selected based on the individual's needs.

Bathroom Aids: Hygiene and toileting are among the most important aspects of daily living. However, those who live with disabilities or are elderly sometimes struggle with this need. Our aids accommodate individuals who cannot stand or need extra support for extended periods. We supply aids such as shower commodes, over-the-toilet aids, bath seats, transfer benches, toilet surrounds, personal grooming aids and much more.

Beds & Bed Rails: At Active Mobility, we have a wide range of beds, so you can be sure your client is getting the right fit. Bed rails can be full-length or partial, and they should be chosen based on the individual's needs and the bed's design. They can provide a sense of security while also helping individuals reposition themselves.
