ARCHABAILITY – A FUSION OF 'ARCHITECTURE' AND 'MOBILITY'

ABOUT US

Archability, a division of Active Mobility, was founded in 2014 with a revolutionary vision to transform the environments of disabled individuals who deserve accessibility to modern comfort. We provide a range of lifters, fixtures and equipment for healthcare projects, such as overhead hoists, overhead hoist tracking, gantry systems, change tables and more.

As proud supporters of the Changing Places initiative, we are committed to equipping public spaces with the essential accessible toileting facilities that are needed to create more inclusive environments.

WHAT WE DO

At Archability, we are dedicated to making public spaces more accessible for everyone. We believe that accessible buildings are just the beginning – the facilities within these spaces are equally important, especially when it comes to providing accessible toileting for people living with disabilities. Whether in office buildings, shopping centres, restaurants, parks, or picnic areas, everyone deserves a safe and dignified experience.

Our extensive range of products is designed to support this mission. From change tables to overhead hoists, we offer a variety of solutions that enable safe, dignified transfers from mobility devices to the toilet/change table. We also stock accessories and parts to help you build a fully functional overhead hoist track system, ensuring ease and safety as users move around spaces without the need to be placed down repeatedly.

From the initial consultation to the final installation, Archability's team provides expert guidance every step of the way, ensuring smooth execution and minimal disruption.

Our consultants collaborate closely with Occupational Therapists and Design Team to plan and configure equipment, ensuring that the custom product is perfectly suited to clients needs and the environment in which it will be used. We are committed to providing the solution that best meets your requirements.

INITIAL CONSULTATION

At Archability, we discuss clients requirements and assess your environment so that we have a complete understanding of clients needs and goals.

PLANNING & SUPPORT

We provide expert planning and support to help you create accessible and functional spaces.

DESIGN & SUPPORT

Our team provides installation drawings, technical specifications, and easy access to product drawings.

INSTALLATION & COMPLETION

We are committed to ensuring that every project is completed smoothly and efficiently.

APPLICATIONS

Archability installs equipment in a range of applications, these include:

- Changing Places
- Nursing Homes
- Hospitals
- Schools
- Aquatic Centres
- Disability Accommodation
- Residential Accommodation
- Physio Gyms
- and more.

"In my experience, unquestionably the most efficient and cost effective way to transfer patients is with overhead lifting systems."

James P.

Changing Places **Transforming Lives**

We are proud advocates and registered providers for Changing Places, which offer accessible toileting, changing, and showering facilities in public spaces. These facilities are designed to meet the needs of individuals with disabilities who are unable to use standard public restrooms with dignity and safety.

Join us in making public spaces more inclusive and accessible for all.
